KEY TO ANNOTATIONS

1. Probable KRUPNYY Class DDGS hull (LOA approx 450').

25X1

2. Unoccupied transporter dock (LOA approx 470').

25X1

3. Probable AMGUEMA Class Cargo Icebreaker (LOA approx 440').

25X1

4. Unidentified vessel (LOA approx 200').

5. Probable "E" Class SSGN (visible length undetermined).

The identification of this submarine is based on the overall configuration, the location of the sail, and two sets of possible exhaust deflectors aft of the sail. The length of this submarine cannot be determined because the stern of the vessel is in shadows cast by the fitting-out mole.

25X1

25X1

This berthing space has previously been used for the fitting-out of "E" Class SSGN [REDACTED] an "E-II" Class SSGN was observed in this berthing space with a light-toned possible cover over a portion of the sail. Tenuous imagery on this coverage also reveals a light-toned spot in the sail area. In addition to this fact, there has been no apparent change in the berthing arrangement of other vessels at the fitting-out mole [REDACTED] This suggests that the submarine imaged on this coverage is the same "E-II" Class SSGN which was imaged [REDACTED]

25X1

25X1

6. Probable AMGUEMA Class Cargo Icebreaker (LOA approx 440').
